Assessment Conditions

- There are three assessment tasks in this assessment. You must complete all tasks.
- This is an open book assessment. However, all answers must be in your own words. Practical tasks must be completed without help from any other person.

Important Note for Assessors

Before giving the assessment to candidates, the assessor must refer to the Important Note for Assessors and Guidance Information given at the end of this assessment document. **This note includes important information for items which need to be prepared before the assessment is given to students.**

Candidate Declaration

I confirm that I have read and understood the conditions of this assessment, and have had the opportunity to get any clarification that I need from my assessor. Any health and safety requirements that I must observe have been outlined. I confirm that all work completed for this assessment is my own and has been produced without assistance from anyone else. Finally, I confirm that the process by which I may seek a review of the marking for this assessment has been outlined to me.

Signed: _____ (candidate) Date: _____

Assessment Introduction

Extreme Sports is a company that arranges extreme sporting activities. They are currently working on promotional materials for:

- ☐ their web page
- ☐ an advertisement (to be printed on a digital printer)
- ☐ a glossy brochure (to be printed on an offset printer).

They have asked you to help them to source and prepare a range of images to be used in their promotional materials.

IMPORTANT: All images you create, source, and edit for **Extreme Sports** must meet the following requirements.

- ☐ They must be:
  - o available under a licence that allows the image to be used, shared, and modified, even commercially, without the need for attribution (eg CC0) OR
  - o created by Extreme Sports themselves for use in their promotional materials OR
  - o created by you.
- ☐ The images must be appropriate for use in advertising that a wide range of people (including young children) will see.
- ☐ The images must help to promote the **Extreme Sports** image of fun, lively, extreme sporting activities.

- In this assessment you will source and prepare the images **Extreme Sports** need.
- Your assessor will be using the **Assessor Checklists** at the end of the assessment to check that you meet all the requirements of all three tasks in this assessment.

INSTANT Education Solutions

Assessment Task 1: Create a vector image

Outcome 2, PC 2.1, 2.2

Instructions to candidate

In this task, you need to create a vector graphic image. To do this you need to use a suitable vector graphics editor such as Adobe Illustrator or Inkscape.
There are **three** parts to this assessment task.
You must complete **all three** parts.

Extreme Sports would like you to create a mobile phone icon that looks similar to that shown on the right.

Time available:	min	The assessor will indicate the time available for completing this task.

Part A Create and save the image

- Create a vector graphic to meet the following requirements.
  - **Size**: Around 80 mm wide X 146 mm high.
- Save file as a vector (eg Illustrator or SVG) with the file name **mobile** and leave it open.
- Optimise the file.
- Save as a compressed SVG with the file name **mobile optimised**.

Part B Export the image

Export the mobile phone icon so that it can be opened in a raster image editing application such as GIMP or Photoshop. The requirements for exporting the file are as follows.

Export as a **JPG** with the following parameters:

- a resolution of 300ppi
- file name: mobile.

Export as a PNG, this time with:

- a transparent background.
- optimised for screen (72 ppi).
- file name: mobile (no alpha)

Part C Import the image into another application

- Open the mobile phone icon **mobile (no alpha).png** in a raster editing application such as Adobe Photoshop or GIMP.

Important: Do one of the following to provide evidence that you have successfully completed this part of the task.

- Ask your teacher to observe you as you import (open) and check the image OR
- Take a screenshot of what the image looks like when opened in the raster editing application (eg Adobe Photoshop). Make sure your screenshot shows the application (eg Adobe Photoshop) and what the image looks like when opened in the application.

- Check that the image displays as intended.

INSTANT Education Solutions

Assessment Task 2

Outcome 1, PC 1.1 - 1.6

Instructions to candidate

In this task you need to:

- source and download images from different locations
- edit images to meet specific requirements.

Extreme Sports have provided you with a folder containing several different images. The folder name is: **Supplied images**.

Your teacher will tell you where to find the folder.

Indicate the folder location here:

https://github.com/TPP-computers/29773

You need to source and edit several images from those you have been supplied with. Copyright information for the images is included in the Supplied images folder as text files.

Part A Extreme Sports Logo

Source the following files from the computer location given to you by your assessor.

Save the files to the specified folder.

Image 1: - Extreme Sports Logo

Requirements

1. Source a vector file that has Extreme Sports' logo.
2. The file needs to have a transparent background and be square in shape.
3. Save with the file name **Extreme Sports square logo** in a folder called **Extreme Sports.**

Editing instructions		(☑)
1.	Open it the file in the appropriate vector editing application.	
2.	Apply CMYK colour	
3.	Change size to 50mm wide	
4.	Optimise so artboard is appropriate size.	
5.	Save as a compressed scalable vector graphic. Folder: **Extreme Sports Ad Assets** File name: **Extreme Sports logo printer**	

Image 2: - Extreme Sports Advertisement

Extreme Sports need a photo of someone who has reached the top of a mountain. The image will be used as part of a composite image that will be professionally digitally printed. There should be a lot of sky in the image as objects will be added.

Requirements

1. Source a landscape orientation photograph suitable for printing.
2. The resolution needs to be at least 300ppi.
3. Save with the file name **climber** in the folder **Extreme Sports.**

INSTANT Education Solutions
2a © Instant Education Solutions Ltd www.instant.org.nz

Editing instructions	(☑)
1. Open in an appropriate raster editing application.	
2. Use CMYK colour mode	
3. Resize image to 8.5cm high (scale as needed).	
4. Adjust the brightness, contrast, levels etc to improve the look of the image.	
5. Insert the file **Extreme Sports logo printer** in the top left-hand corner of the climber photograph. Resize the logo as needed, but make sure it is not smaller than 2cm wide.	
6. Recolour the mountain in the logo using colours from the landscape. Adjust if necessary.	
7. Add the following text as a separate layer to the side of the climber. You use any appropriate font and layout. "No limit too extreme!" Colour the text the same colour as the yellow in the logo.	
8. Save the file with the name **Extreme Sports Brochure Ad (layers) in the Exteme Sports Ad Assets** folder. The file must be saved in a format that will allow it to be edited, using separate layers. Use a resolution of at least 400ppi.	
9. Flatten the image, and save to the **Extreme Sports Ad Asset**s folder with the file name: **Extreme Sports Brochure Ad (flattened)**.	
10. Export the file in CMYK colour mode, JPEG format, with the file name: **Extreme Sports Brochure Ad (final)**. The file must be no larger the 1MB. Export to the **Extreme Sports Ad Assets** folder.	

Image 3: - Mountain Climbing Icon

Source an icon image of someone a climbing mountain. The image will be used for a web page. Save with the file name **Mountain icon** to the folder **Extreme Sports**.

Editing instructions	(☑)
1. Open in a raster editing application.	
2. Recolour image. Choose a mid blue.	
3. Resize to 100px wide.	
4. Colour mode RGB.	
5. Save with a resolution and format suitable for use on a web page. Folder: **Extreme Sports Ad Assets** File name: **Mountain icon (edited)**	

Part B Import image from digital device

Image 4

In this part you will source the image from a digital camera or smart device such as a phone camera. The image will be used on a web page. Save to the **Extreme Sports** folder.

Instructions	(☑)
1. Using a digital camera or phone camera, take a photo one of the following: • A skatepark or skateboard • A mountain or BMX bike You can ask someone to take the photo for you if you wish.	
2. Import the file into an image editing program such as Photoshop or Gimp, and optimise the file size for use on a screen. (For example using a USB connection or SD card).	
3. Adjust colour to greyscale.	
4. Resolution 150dpi.	
5. Save in jpg format to the **Extreme Sports Ad Assets** folder with a file size of less than 2 MB. Use an appropriate file name.	

Assessment Task 3

Outcome 1, PC 1.1-1.6

Instructions to candidate

In this task, you need to source two different images from the internet.

There are **three** parts to this assessment task. You must complete **all three** parts

Extreme Sports would like you to source some additional images for them to use in their promotional materials.

Important reminder: The images you source must meet the requirements set out in the Assessment Introduction (p. 3). This includes ensuring the images meet the specified copyright requirements and are ethically and morally appropriate for the specified intended audience and situation

Part A

Source the following images from the internet and edit as instructed.

Image 5

Photograph of someone skydiving. The image must include bright colours (eg of the parachute or clothing the skydiver is wearing).

Image must be:

- Portrait orientation
- Capable of at least 300ppi resolution at a height of 1920px.
- Suitable for professional digital print
- File size should be less than 2Mb.
- Save the image as **skydiving original**.

Image 6

Source an image suitable to be a lightbulb icon for a web page.

- The image must be vertical orientation and at least 72ppi.
- The bulb itself must be yellow.
- Save the image as **lightbulb icon**.

Part B : Record copyright information (PC1.6)

Record all relevant copyright information for each of the images downloaded in Part A. You can do this in the file properties for the image (where possible), or as a separate text file.

Part C: Open images and edit (PC 1.3)

1. Open each of the images in a relevant image editing application.
2. Check that the images are not distorted (eg stretch or squashed).
3. Make sure that the images have the appropriate resolution required for the intended output (ie media the image will be used in).

Important: Do one of the following to provide evidence that you have successfully completed this part of the task.

- Ask your teacher to observe you as you import (open) and check the image OR
- Take a screenshot of what the image looks like when opened in the relevant image editing application as well as a screenshot showing the resolution of the image. Make sure your screenshots shows the application (eg Photoshop) and what the image looks like when opened in the application.

4. Edit the images as follows:

Open the image in your editing software and make the following adjustments:

***skydiving* adjustments:**	**(☑)**
1. Height:1920px	
2. Colour mode: CMYK	
3. Resolution 300ppi	
4. Save as suitable for use for digital print. Folder: **Extreme Sports Ad Assets** File name **skydiving edited.**	

***lightbulb icon* adjustments:**	**(☑)**
1. Optimised for screen	
2. Colour mode: RGB	
3. Resolution 72ppi	
4. Save as PNG with transparent background. Folder: **Extreme Sports Ad Assets** File name **lightbulb icon edited**.	

Assessor Checklist: Assessment Task 1			
PC	**Part**		✓
2.1	A	The candidate created the specific graphic image: ❑ saved as **mobile** in native format.	
	A	The vector image met the following requirements. ❑ **Image size**: Around 80 mm wide X 146 mm high ❑ The image was optimised. ❑ The image was saved as a compressed SVG. File name: **mobile optimised**	
	B	The candidate exported the file to JPG . The JPG version: ❑ has a resolution of 300dpi ❑ is named **mobile.png**	
	B	The candidate saved a PNG file with the file name: **mobile (no alpha).png**, and the following characteristics: ❑ transparent background ❑ optimised for screen (72 ppi)	
	Important Note: In Part A and B of Assessment Task 1, candidates get more than one opportunity to demonstrate their ability to save the image with a specified resolution Candidates only need to correctly demonstrate the above ONCE.		
2.2	C	The candidate opened the image in a raster editing application, and ensured it displayed as intended.	
Assessor's Comments [Please indicate whether the candidate has supplied screenshots as evidence for Part C, or whether you observed the candidate open and check the image]:			

Assessor Checklist: Assessment Task 2 and 3									
PC	Task& Part	Requirement	TASK 2				TASK 3	
			Image 1	Image 2	Image 3	Image 4	Image 5	Image 6
1.1 1.2	2A, 3	The candidate correctly identified images that met the specified requirements for: ❑ the media the images were to be used in (including web, digital print) - includes appropriate file format						
	2A	The candidate sourced images from a computer (may include network location/folder, if relevant).						
	2B	The candidate sourced an image from a smart phone or digital camera						
	3A	The candidate sourced images from the internet.						
1.3	2,3C	Images were opened and prepared the images for adjustment/editing.						
		Images maintained their original integrity by not being distorted.						
		Images were prepared at the appropriate resolution for the intended media output (web, digital print, offset print).						

PC	Task& Part	Requirement	TASK 2				TASK 3	
			Image 1	Image 2	Image 3	Image 4	Image 5	Image 6
1.4	2 & 3	The candidate edited images for a range of media including web and digital print. This included ensuring the images met requirements related to all of the following.						
		Resolution						
		Image size						
		Colour mode						
		File size – must be suitable for use						
		File format						
		The candidate correctly made at least two of the following adjustments/edits. I**MPORTANT:** Candidates are given multiple opportunities to demonstrate these editing skills, but they only need to correctly demonstrate two different types of editing changes						
		Brightness and contrast						
		Tonal range						
		Composition						
		Colour						
		Pixel selects						
		Layers						
		Flattening image						
		Text						

PC	Task& Part	Requirement	TASK 2				TASK 3	
			Image 1	Image 2	Image 3	Image 4	Image 5	Image 6
1.5	**2 & 3**	The candidate correctly saved and named the edited images as required. This includes saving the images in a file format (type) specified and that would allow the image to be used in other media and applications.						
1.6	**2 & 3**	The candidate ensured applicable legal, ethical, and moral considerations were applied when using the images. This includes sourcing images that met the required copyright licencing, and were ethically and morally appropriate for the intended audience and situation.						

Assessment Schedule for Unit 29773v2a

29773 Produce digital images for a range of digital media Level 2 Credit 3

Name	Date
Course	NSN No.

Performance Criteria	Evidence Statement (what the assessor looks for)	Judgement Statement (how well or how many)	✓
Outcome 1: Source and edit selected images. *Range: a minimum of six images for a range of media, each with different resolution and size requirements; media includes but is not limited to – website, digital print; and may include offset print.*			
1.1 Images are identified to suit the given requirements.	Assessment Tasks 2 and 3: Image files saved in appropriate folder. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate correctly identified six images to suit the specified requirements. The requirements included: • the media the images were to be used in (including web or digital print) • image resolution • image size.	
1.2 Images are sourced and downloaded from the input devices available. *Range: evidence is required from the internet plus two devices that may include but are not limited to – scanner, digital camera, computer storage/hard drive, smart devices, portable input device.*	Assessment Tasks 2 and 3: Image files saved in appropriate folder. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate sourced the six images from the following input devices, as required. • A computer (could be a network location/folder) • The internet • Digital camera	
1.3 Images are opened and prepared for editing, retaining original integrity. *Range original integrity includes – images not being distorted; appropriate resolution for the intended output.*	Assessment Tasks 2 and 3: Image files saved in appropriate folder. Assessor observation or screenshots showing image in raster or vector editing application Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate downloaded, opened and prepared the images for adjustment/editing. This was done while ensuring that the images maintained their original integrity by not being distorted. The candidate ensured the images were downloaded, opened and prepared at the appropriate resolution for the intended media output (web, digital print, offset print).	

1.4 Images are edited to meet the given requirements. *Range includes – resolution, image size, colour mode, file size, format;* *editing parameters include but is not limited to a minimum of two from – brightness, contrast, tonal range, composition, red-eye removal, colour, brush tools, pixel selects, layers, flattening images, text.*	Assessment Task 2 and 3 Image files saved in appropriate folder. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate edited at least six for a range of media including web, digital print, and offset print. This included ensuring the images met requirements related to all of the following. • Resolution • Image size • Colour mode • File size • File format The candidate also correctly made at least two of the following adjustments/edits. • Brightness and contrast • Tonal range • Composition • Colour • Pixel selects • Layers • Flattening image • Text	
1.5 Edited images are named and saved in a format appropriate to the given requirements. *Range saved includes but is not limited to – file types; ready for exporting and use in other media and applications.*	Assessment Task 2 and 3 Image files saved in appropriate folder. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate correctly saved and named the edited images as required. This includes saving the images in a file format (type) specified and that would allow the image to be used in other media and applications.	
1.6 Images are used according to applicable legal, ethical and moral considerations. *Range considerations include but are not limited to – creative commons, copyright, attribution, licencing; privacy; appropriateness to situation.*	Assessment Tasks 2 and 3: Image files saved in appropriate folder Copyright information saved in file properties or provided in text file in same folder as image. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate ensured applicable legal, ethical, and moral considerations were applied when using the images. This includes sourcing images that met the required copyright licencing, and were ethically and morally appropriate for the intended audience (general audience) and situation (promotion of organisation).	

Outcome 2: Use digital drawing tools to create a vector graphic image			
2.1 Vector graphic image is created, optimised and saved to meet requirements. Range: requirements include but are not limited to – standard and transparent background; image size; file types ready for exporting and use in other media and applications.	Assessment Task 1 Image files saved in appropriate folder. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate created a vector graphic image that met all the specified requirements. This included: • optimising the image for its intended output • ensuring the image was the size specified • creating the image with both a standard and transparent background (two versions of the image) • saving the two versions of the image using the specified file name, and in the required format for use in other media and applications.	
2.2 Graphic is imported successfully into another application and checked to ensure it displays as intended	Assessment Task 1 Assessor observation or screenshots showing image in raster editing application. Assessor Checklist [See sample answers provided in the Assessment Sample Answers document]	The candidate successfully imported the graphic into a raster editing application (eg Adobe Photoshop or GIMP), and checked that it displayed as intended.	
Assessor's Comments			

Assessor's Attestation

As assessor for this unit standard, I have ensured sufficiency of performance and knowledge by this learner. I can confirm that the assessment conditions and the actions of the learner and assessor have complied with all relevant Health and Safety requirements, in addition to any other relevant compliance requirements.

Assessor's Name:	Date:

Unit Standard 29773 Version 2a

Produce digital images for a range of digital media

Outcomes and Evidence requirements

Outcome 1
Source and edit selected images.

Range: a minimum of six images for a range of media, each with different resolution and size requirements; media includes but is not limited to – website, digital print; and may include offset print.

Evidence requirements

1.1 Images are identified to suit the given requirements

1.2 Images are sourced and downloaded from the input devices available.

Range: evidence is required from the internet plus two devices that may include but are not limited to – scanner, digital camera, computer storage/hard drive, smart devices, portable input device.

1.3 Images are opened and prepared for editing, retaining original integrity.

Range: Range original integrity includes – images not being distorted; appropriate resolution for the intended output.

1.4 Images are edited to meet the given requirements.

Range: parameters include but is not limited to a minimum of two from – brightness, contrast, tonal range, composition, red-eye removal, colour, brush tools, pixel selects, layers, flattening images, text.

1.5 Edited images are named and saved in a format appropriate to the given requirements.

Range: saved includes but is not limited to – file types; ready for exporting and use in other media and applications.

1.6 Images are used according to applicable legal, ethical and moral considerations.

Range: considerations include but are not limited to – creative commons, copyright, attribution, licencing; privacy; appropriateness to situation

Outcomes and Evidence requirements

Outcome 2
Use digital drawing tools to create a vector graphic image.

Evidence requirements

2.1 Vector graphic image is created, optimised and saved to meet requirements.

Range: *requirements include but are not limited to – standard and transparent background; image size; file types ready for exporting and use in other media and applications.*

2.2 Graphic is imported successfully into another application and checked to ensure it displays as intended.

Guidance Information

1. Assessment, where applicable, will be conducted in and for the context of a real or realistic situation and/or setting, and be relevant to current and/or emerging practice. The assessor may gather evidence over time from a range of scenarios rather than using one assessment where the learner has to demonstrate all of the required skills.
2. The requirements for the images will be supplied to the learner, and will include audience, topic and the final specifications. Final specifications include but are not limited to – resolution, image size, colour mode, file size, file format. Sources must be acknowledged, and consideration must be given to creative commons and copyright.
3. Definitions

   Copyright refers to the exclusive legal right given to a creator to control the reproduction of their work.

   Creative Commons (CC) refers to collaborative global commons, which may include public domain free tools, for the sharing and use of creativity and knowledge, which work alongside copyright.

   Images refer to bitmap/raster or vector graphics.

   Vector graphic image is the use of geometrical elements such as points, lines, curves, shapes and polygons to represent images in computer graphics.
4. Legislation relevant to this unit standard may include but is not limited to the:

   Copyright Act 1994

   Copyright (New Technologies) Amendment Act 2008

   Defamation Act 1992

   Films, Videos, and Publications Classification Act 1993

   Harmful Digital Communications Act 2015

   Health and Safety at Work Act 2015

   Privacy Act 2020

   Telecommunications Act 2001

   Unsolicited Electronic Messages Act 2007 and any subsequent amendments.

   Current legislation and regulations can be accessed at http://legislation.govt.nz.
5. Reference

   ACC5637 Guidelines for Using Computers - Preventing and managing discomfort, pain and injury. Accident Compensation Corporation - Department of Labour, 2010; available from Worksafe New Zealand, at http://www.business.govt.nz/worksafe/information-guidance/all-guidance-items/guidelines-for-using-computers.

Important Note for Assessors

1. For Assessment Task 2, you must ensure that the supplied images (which can be found in the Assessment Resources folder), have been saved to an appropriate location that the learner can access from their computer (eg on the computer's hard drive itself, or in a network folder the learner is able to access). You must clearly indicate to learners what the location is of this folder.
2. Sample answers and/or assessor's comments are supplied in the separate Assessment Sample Answers document available to assessors.
3. A copy of the Assessment Sample Answers document and any other assessment evidence must be submitted with this Assessment Booklet when moderation is called for.
